

State of California  
AIR RESOURCES BOARD

EXECUTIVE ORDER D-241-7

Relating to Exemptions Under Section 27156  
of the California Vehicle Code

Mac Products, Inc.  
Mac Air Induction System

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-02-003;

IT IS ORDERED AND RESOLVED: That the installation of the Mac Air Induction System, manufactured and marketed by Mac Products, Inc., 43214 Blackdeer Loop, Temecula, California 92590, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for applicable to 2001 through 2008 model-year General Motors trucks and Ford vehicles as listed in Exhibit A.

The Mac Air Induction System includes the following main components: open-element reusable air filter, filter enclosure (as applicable), intake system tubing, crankcase ventilation hose (as applicable, which may be silicone, and a color other than black), assorted brackets, and hardware. The stock mass air flow sensor element for Ford applications is transferred to the new air intake tubing.

This Executive Order is valid provided that the installation instructions for the Mac Air Induction System will not recommend tuning the vehicle to specifications different from those submitted by the device manufacturer.

Changes made to the design or operating conditions of the Mac Air Induction System, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

This Executive Order shall not apply to any Mac Air Induction System advertised, offered for sale, sold with, or installed on a new motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Marketing of the Mac Air Induction System using any identification other than that shown in this Executive Order or marketing of the Mac Air Induction System for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the Mac Air Induction System may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on emission test results in the modified configuration using the Cold-Start CVS-75 Federal Test Procedure, Supplemental Federal

Test Procedure (US06), and an examination of the On-Board Diagnostic II (OBD II) system. A 2007 model year Chevrolet Sierra with a 5.3 liter engine (7GMXTO5.3380, LEV II ULEV) and a 2007 model year Ford Mustang with a 4.0 liter engine (7FMXV04.0VBR, LEV II ULEV) was used for the evaluation of the Mac Air Induction Systems. Results from emissions testing conducted at Automotive Testing and Development Services, Inc., located in Ontario, California, are shown below (in grams per mile with deterioration factors applied):

<b>Sierra</b>	CVS-75				US06	
	NMOG	CO	NOx	HCHO	NMHC+NOx	CO
Standards, UL	0.070	2.1	0.04	0.011	0.40	10.5
Air Induction System	0.068	1.3	0.02	0.001	0.05	0.5

<b>Mustang</b>	CVS-75				US06	
	NMOG	CO	NOx	HCHO	NMHC+NOx	CO
Standards, 50K	0.040	1.7	0.05	0.008	0.14	8.0
Air Induction System	0.037	0.5	0.02	0.001	0.03	0.3

The emission test results in the modified configuration were either at or below the applicable certification standards. Examination of the OBD II system showed the Mac Air Induction System does not affect OBD II system operation. A similar effect on vehicle emissions and OBD II system operation is expected with the installation of the Mac Air Induction System on vehicles listed in this Executive Order.

The Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE MAC AIR INDUCTION SYSTEM.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 30<sup>th</sup> day of May 2008.

  
Annette Hebert, Chief  
Mobile Source Operations Division
