

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-260-14

Relating to Exemptions Under Section 27156
of the California Vehicle Code

HYPERTech, INC.
Max Energy, Max Energy ECON, and the HyperPAC

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-02-003;

IT IS ORDERED AND RESOLVED: That the installation of the Max Energy, Max Energy ECON, and the HyperPAC, manufactured and marketed by Hypertech, Inc., 3215 Appling Road Bartlett, Tennessee 38133-3999, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following vehicle applications listed in Exhibit A.

The Max Energy and Max Energy ECON (both hand held programmers), and the HyperPAC are designed to reprogram the engine and/or transmission control module to modify the operating parameters. The programmers are designed to download OEM calibration updates, non emission related upgrades, and patches or fixes in the firmware. Emission-related data files cannot be modified by the end user. The HyperPAC, is the same as the hand held programmers with the addition of a dash mount display for engine operating parameters. The HyperPAC uses the OBD II port to obtain engine operating parameters for its display. **The HyperPAC may be unplugged from the OBD II port during the Smog Check Inspection program in California.**

This Executive Order is valid provided that the installation instructions for the Max Energy, Max Energy ECON, and the HyperPAC will not recommend tuning the vehicle to specifications different from those submitted by the device manufacturer.

Changes made to the design or operating conditions of the Max Energy, Max Energy ECON, and the HyperPAC, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

This Executive Order shall not apply to any Max Energy, Max Energy ECON, and the HyperPAC advertised, offered for sale, sold with, or installed on a new motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Marketing of the Max Energy, Max Energy ECON, and the HyperPAC using any identification other than that shown in this Executive Order or marketing of the Max Energy, Max Energy ECON, and the HyperPAC for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the Max Energy, Max Energy ECON, and the HyperPAC may have on any warranty either expressed or implied by the vehicle manufacturer.

Hypertech, Inc. submitted emissions test data generated on six tests vehicles modified with the Max Energy premium tune program. Test results showed that emission levels met the applicable emission standards when tested using the Cold-Start CVS-75 Federal Test Procedure (FTP) test cycle and the Supplemental Federal Test Procedure (SFTP-US06) test cycle. Examination of the OBD II system showed that the programmer did not affect OBD II system operation. Results from emissions testing conducted at the Auto Club Emissions Laboratory, located in Diamond Bar, California, and California Environmental Engineering, located in Santa Ana, California are shown below (in grams per mile).

** Two FTP tests were required because the Auto Club has a CVS measurement system.

The Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE MAX ENERGY SPORT POWER PROGRAMMER.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 20 day of October 2011.

Annette Hebert, Chief
Mobile Source Operations Division
