

State of California  
AIR RESOURCES BOARD

EXECUTIVE ORDER D-267-2  
Relating to Exemptions Under Section 27156  
of the Vehicle Code

CYCLONE USA, INC.  
TORNADO AIR MANAGEMENT SYSTEMS

Pursuant to the authority vested in the Air Resources Board (ARB) by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Sections 39515 and 39516 of the Health and Safety Code and Executive Order G-45-9;

IT IS ORDERED AND RESOLVED: That the installation of the Tornado Air Management Systems (Tornado Systems) manufactured by Cyclone USA, Inc. (Cyclone) of 13360 Firestone Boulevard, Suite H, Santa Fe Springs, CA 90670 has been found not to reduce the effectiveness of the applicable vehicle pollution control system, and therefore, the device is exempt from the prohibitions of Section 27156 of the Vehicle Code for installation on the selected vehicle makes and model-years listed in the enclosed Application Guide.

This Executive Order is valid provided that installation instructions for Cyclone's Tornado Systems will not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the Tornado Systems, as exempt by the ARB, which adversely affect the performance of a vehicle's pollution control system, shall invalidate this Executive Order.

Marketing of the Tornado Systems using any identification other than that shown in this Executive Order or marketing of the Tornado Systems for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the ARB.

This Executive Order does not constitute any opinion as to the effect the use of the Tornado Systems may have on any warranty either expressed or implied by the vehicle manufacturer.

In addition to the foregoing, the ARB reserves the right to conduct additional emission tests, in the future, as such tests are developed, that will more adequately measure emissions from all cycle phases. If such test results demonstrate that the Tornado Systems listed in the Application Guide adversely affect emissions during off-cycle conditions (defined as those conditions which are beyond the parameters of the Cold-Start CVS-75 Federal Test Procedure), this Executive Order shall be effectively rescinded as of the date the test results are validated. Further, if such test results or other evidences provide the ARB with reasons to suspect that the Tornado Systems listed in the Application Guide will affect the durability of the emission control system, Cyclone shall be required to submit durability data to show that the durability of the vehicle emission control system is not,

in fact, affected and/or that the add-on or modified part demonstrates adequate durability. In addition to the foregoing, the ARB reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of California Code of Regulations, Title 13, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF THE CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF CYCLONE USA, INC'S TORNADO AIR MANAGEMENT SYSTEMS.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after ten day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request, and the order may not be revoked until a determination after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 8<sup>th</sup> day of May 1995.

R. P. Summerfield  
Assistant Division Chief  
Mobile Source Division

# Application Guide of Tornado Air Management Systems

The above information represents suggested guidelines for the Tornado product. However, due to inconsistencies in auto manufacturing, the installer may discover that a unit other than the one suggested in this guide actually fits better. The installer should install whichever unit fits better and we will update this guide. Installers are cautioned that this information guide is illustrative and it is the responsibility of the installer to be certain that each unit installed fits the automobile.

The above information represents suggested guidelines for the Tornado product. However, due to inconsistencies in auto manufacturing, the installer may discover that a unit other than the one suggested in this guide actually fits better. The installer should install whichever unit fits better and we will update this guide. Installers are cautioned that this information guide is illustrative and it is the responsibility of the installer to be certain that each unit installed fits the automobile.

The above information represents suggested guidelines for the Tornado product. However, due to inconsistencies in auto manufacturing, the installer may discover that a unit other than the one suggested in this guide actually fits better. The installer should install whichever unit fits better and we will update this guide. Installers are cautioned that this information guide is illustrative and it is the responsibility of the installer to be certain that each unit installed fits the automobile.
