

State of California  
AIR RESOURCES BOARD

EXECUTIVE ORDER D-288-21  
Relating to Exemptions Under Section 27156  
of the Vehicle Code

TRANSFER FLOW, INC.  
REPLACEMENT FUEL STORAGE SYSTEM

Pursuant to the authority vested in the Air Resources Board (ARB) by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Sections 39515 and 39516 of the Health and Safety Code and Executive Order G-45-9;

IT IS ORDERED AND RESOLVED: That the installation of the Replacement Fuel Storage System, manufactured by Transfer Flow, Inc. (TFI) of 1444 Fortress Street, Chico, California 95973, has been found not to reduce the effectiveness of the applicable vehicle pollution control system, and therefore, the Replacement Fuel Storage System is exempt from the prohibitions of Section 27156 of the Vehicle Code for installation on 2001 model-year General Motors Corporation 3.4 liter Venture minivans, originally equipped with a 25-gallon plastic fuel tank.

This exemption is based on On-Board Refueling Vapor Recovery (ORVR) and On-Board Diagnostic II (OBD II) system testing conducted by TFI. Based on evaluation of ORVR emission data and OBD II system test results, it was concluded that TFI's Replacement Fuel Storage System does not adversely affect the vehicle's refueling emissions or reduce the effectiveness of its OBD II system. Based on engineering evaluation of previous fuel tank temperature data, it was also concluded that the Replacement Fuel Storage System would not adversely affect the vehicle's evaporative emissions.

Exemption of the Replacement Fuel Storage System shall not be construed as an exemption to sell, offer for sale, or advertise any component of the Replacement Fuel Storage System as individual devices.

This Executive Order is valid provided that installation instructions for the Replacement Fuel Storage System do not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the Replacement Fuel Storage System, as exempt by the ARB, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of the Replacement Fuel Storage System using an identification other than that shown in this Executive Order or for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the ARB.

In addition to the foregoing, the ARB reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222 et seq.

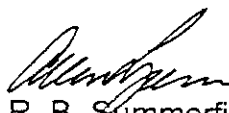

This Executive Order does not constitute any opinion as to the effect the use of the Replacement Fuel Storage System may have on any warranty either expressed or implied by the vehicle manufacturer.

No claim of any kind, such as "Approved by the Air Resources Board," may be made with respect to the action taken herein in any advertising or other oral or written communication.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF TRANSFER FLOW, INC.'S REPLACEMENT FUEL STORAGE SYSTEM.

Violation of any of the above conditions shall be grounds for revocation of this Executive Order. The Executive Order may be revoked only after a ten-day written notice of intention to revoke the Executive Order, in which period the holder of the Executive Order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the Executive Order may not be revoked until a determination after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 2<sup>ND</sup> day of May 2001.
