

State of California  
AIR RESOURCES BOARD

EXECUTIVE ORDER D-513  
Relating to Exemptions Under Section 27156  
of the Vehicle Code

SPW INDUSTRIES  
HAYAME PERFORMANCE COLD AIR INTAKE KIT

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-45-9;

IT IS ORDERED AND RESOLVED: That the installation of the Hayame Performance Cold Air Intake Kit, manufactured and marketed by SPW Industries, 201 Bernoulli Circle, Building D, Oxnard, California 93030, has been found not to reduce the effectiveness of the applicable vehicle pollution control system and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the vehicles listed in Exhibit A.

The Hayame Performance Cold Air Intake Kit includes the following main components: open-element reusable air filter, intake system tubing, silicone crankcase ventilation hose (as applicable), assorted brackets, and hardware.

This Executive Order is valid provided that the installation instructions for the Hayame Performance Cold Air Intake Kit will not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

Changes made to the design or operating conditions of the Hayame Performance Cold Air Intake Kit, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

This Executive Order shall not apply to any Hayame Performance Cold Air Intake Kit advertised, offered for sale, sold with, or installed on, a motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Marketing of the Hayame Performance Cold Air Intake Kit using any identification other than that shown in this Executive Order or marketing of the Hayame Performance Cold

Air Intake Kit for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the Hayame Performance Cold Air Intake Kit may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on an examination of the On-Board Diagnostic II (OBD-II) system of the vehicle in the modified configuration, and an engineering evaluation of the emissions impact of the device if measured using the Cold-Start CVS-75 Federal Test Procedure. However, the ARB finds that reasonable grounds exist to believe that use of the SPW Industries Hayame Performance Cold Air Intake Kits may adversely affect emissions of motor vehicles when operating under conditions outside the parameters of the CVS-75 Federal Test Procedure. Accordingly, the ARB reserves the right to conduct additional emission tests, in the future, as such tests are developed, that will more adequately measure emissions from all cycle phases. If such test results demonstrate that the SPW Industries Hayame Performance Cold Air Intake Kit adversely affect emissions during off-cycle conditions (defined as those conditions which are beyond the parameters of the Cold-Start CVS-75 Federal Test Procedure), this Executive Order shall be effectively rescinded as of the date the test results are validated. Further, if such test results or other evidence provides the ARB with reason to suspect that the Hayame Performance Cold Air Intake Kit will affect the durability of emission control systems, SPW Industries shall be required to submit durability data to show that the durability of vehicle emission control systems are not, in fact, affected and/or that the add-on or modified part demonstrates adequate durability.

In addition to the foregoing, the ARB reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

**THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY OTHER CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF SPW INDUSTRIES' HAYAME PERFORMANCE COLD AIR INTAKE KIT.**

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 24<sup>th</sup> day of January 2001.

R. B. Summerfield, Chief  
Mobile Source Operations Division

Approval does not signify that the contents necessarily reflect the views and policies of the Air Resources Board, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.)

## SUMMARY

SPW Industries of 201 Bernoulli Circle, Building D, Oxnard, California 93030, has applied for an exemption from the prohibitions in Section 27156 of the California Vehicle Code (VC) for the Hayame Performance Cold Air Intake Kit designed for the vehicles listed in Exhibit A.

Based on engineering evaluation and an examination of the On-Board Diagnostic II (OBD-II) system with the Hayame Performance Cold Air Intake Kit installed, the staff concludes that the SPW Industries Hayame Performance Cold Air Intake Kit will not adversely affect exhaust emissions from vehicles for which the exemption is requested.

The staff recommends that SPW Industries be granted an exemption as requested and that Executive Order D-513 be issued.

EVALUATION OF SPW INDUSTRIES'  
HAYAME PERFORMANCE COLD AIR INTAKE KIT  
FOR AN EXEMPTION FROM THE PROHIBITIONS OF VEHICLE CODE  
SECTION 27156 IN ACCORDANCE WITH SECTION 2222, TITLE 13, OF THE  
CALIFORNIA CODE OF REGULATIONS

I. INTRODUCTION

SPW Industries of 201 Bernoulli Circle, Building D, Oxnard, California 93030, has applied for an exemption from the prohibitions in Section 27156 of the California Vehicle Code (VC) for the Hayame Performance Cold Air Intake Kit.

II. CONCLUSIONS

Based on engineering evaluation and an examination of the On-Board Diagnostic II (OBD-II) system with the Hayame Performance Cold Air Intake Kit installed, the staff concludes that the SPW Industries Hayame Performance Cold Air Intake Kit will not adversely affect exhaust emissions from the vehicles for which the exemption is requested.

III. RECOMMENDATION

The staff recommends that SPW Industries be granted an exemption for their Hayame Performance Cold Air Intake Kit for installation on the vehicles listed in Exhibit A. The staff also recommends that Executive Order D-513 be issued.

IV. HAYAME PERFORMANCE COLD AIR INTAKE KIT DESCRIPTION

SPW Industries offers various intake systems through its Hayame Performance Cold Air Intake Kit product line. These intake systems have been specifically designed for installation on the vehicles listed in Exhibit A. Each

system operates in conjunction with the original equipment manufacturer's (OEM) computer controlled fuel injection system and emission control system already certified with the stock engine, with the exception of the stock airbox, portions of the stock intake tubing, and crankcase ventilation hose.

The intent of installing the Hayame Performance Cold Air Intake Kit is to increase the vehicle's volumetric efficiency and power output at particular engine loads and throttle openings. At heavy engine loads and increased throttle openings, the airflow into the engine is increased because the Hayame Performance Cold Air Intake Kit kits are less restrictive than stock air filters. This allows more air to enter the engine, which is compensated by the vehicle engine control module with an increase in fuel flow, resulting in a higher power output. However, the fuel enrichment is limited and the typical net effect is an overall leaning effect of the fuel mixture. The leaning effect is manifested in a marginal, but measurable, NOx increase. Worst-case vehicles are examined for their certification emissions. In cases where certification emissions have values low enough to accommodate any small increase in emissions (in this case NOx), emission testing is deemed not required.

The filter element used in the Hayame Performance Cold Air Intake Kit is an open-element, reusable cotton gauze unit, designed to be less restrictive than the stock air filter.

The installation of the kit does not require any major modifications to the stock motor, except for the modification of the factory air intake system to

accommodate the Hayame Performance Cold Air Intake Kit air filter and plumbing. On some models, relocation of the crankcase ventilation hose is required. In these cases, the Hayame Performance Cold Air Intake Kits are supplied with silicone crankcase ventilation hoses.

V. DISCUSSION OF THE HAYAME PERFORMANCE COLD AIR INTAKE KIT

No emissions measurement was required for the evaluation of the Hayame Performance Cold Air Intake Kit. Similar systems have been tested and have shown to have only a slight influence on emissions, namely a marginal increase in NOx due to a leaning effect of the less restrictive intake system. The affected vehicles have certification values which are low enough to accommodate any small increase in NOx emissions.

A 2000 Honda Accord LX with a 2.3 liter four cylinder engine (engine family YHNXV02.3PL4) was used for the evaluation of the Hayame Performance Cold Air Intake Kit. The test vehicle was certified to Passenger Car Ultra Low-Emission Vehicle (PC ULEV) standards and was equipped with an enhanced evaporative system. Testing consisted of one CVS-75 Federal Test Procedures (FTP) in the modified configuration (Hayame Performance Cold Air Intake Kit installed) to set all On-Board Diagnostics (OBD) II readiness indicators, and was conducted at California Analytical Instruments, Inc. The ARB did not perform testing to confirm the test results submitted by the applicant.

Based on engineering evaluation and the OBD-II test results, the staff concludes that the SPW Industries Hayame Performance Cold Air Intake Kit meets the requirements for VC 27156 exemption of general criteria parts. However, the ARB finds that reasonable grounds exist to believe that use of the SPW Industries Hayame Performance Cold Air Intake Kit may adversely affect emissions of motor vehicles when operating under conditions outside the parameters of the previously prescribed test procedure. Accordingly, the ARB reserves the right to conduct additional test in the future, as such tests are developed.

SPW Industries has submitted all the required information and fulfilled the requirements for an exemption.
